

## Quick Migration to Amazon WorkSpaces

Today's new reality is leading to increasing the remote workforce, expanding automation and accelerating cloud adoption. Organizations need to be more cloud native, more agile, and focus on modernizing existing systems.

Organizations in today's uncertain world are encountering:

- A forced distributed workforce due to social distancing and government policies.
- Difficulties procuring and provisioning mobile hardware quickly.
- Incomplete or incorrect deployment of remote-capable hardware, resulting in idle employees and downtime.

In order to be successful in today's newly defined technology world, organizations need to provide tools to promote a productive work environment, provision remote employees' appropriate hardware & software, all while maintaining security, compliance and IT support policies.

Amazon WorkSpaces is a managed, secure Desktop-as-a-Service (DaaS) solution and offers the solution to all these newly discovered problems. You can use Amazon WorkSpaces to provision either Windows or Linux desktops in just a few minutes and quickly scale to provide thousands of desktops to workers across the globe.

Amazon WorkSpaces helps you eliminate the complexity in managing hardware inventory, OS versions and patches, and Virtual Desktop Infrastructure (VDI), which helps simplify your desktop delivery strategy. With Amazon WorkSpaces, your users get a fast, responsive desktop of their choice that they can access anywhere, anytime, from any supported device.

The Amazon WorkSpaces solution offered by Coda, a Presidio Cloud Company, can be started in a matter of days and provides:

Deployment & Education

Monitoring & Compliance

Networking

Automation

### AWS is offering a WorkSpaces promotional offer with the following provisions:

- Beginning April 1st, AWS is offering Amazon WorkSpaces for up to 50 users at no charge for new WorkSpaces customers, offer available through June 30, 2020. This offer will include our Standard, Value, and Performance bundles.
- Amazon WorkSpaces users also receive access to Amazon WorkDocs with 50 GB of storage for no additional charge. This can be upgraded to 1 TB of storage per WorkSpaces user for a discounted price. For more information, see Amazon WorkDocs Pricing.
- You can use Amazon WAM to deploy and manage applications for Amazon WorkSpaces. Amazon WAM is priced on a monthly per user basis, and includes a free and a paid tier. For more information, see the Amazon WAM pricing table.
